

SOUNDSATIONS™

SOUNDSATIONS™

This audio-ready option is now available on all Marquis Spas, Everyday Hot Tubs, and Hideaway Hot Tubs. Soundsations enables your spa to become an extension of your home stereo system, while allowing you to relax and enjoy your outdoor environment.

YOUR SPA BECOMES AN OUTDOOR SPEAKER

- Using sonar technology, multiple transducers are strategically placed inside the spa cabinet and provide a true stereo effect with left and right audio channels.
- Sound literally comes through the spa shell and water, surrounding you as you soak, creating a balanced surround sound.
- Soundsations works even with the spa cover on. You really must hear it to believe it!

THE ULTIMATE CONVENIENCE

- The convenience of Soundsations means no need to carry CDs back and forth from the house to the spa.
- You can choose to listen to your favorite radio station (even satellite radio), TV show or any other medium available through your home stereo equipment.
- The optional Dolphin universal remote allows you to change CDs, skip tracks or control the volume – all without getting out of your spa.
- The Dolphin remote can virtually control all your home electronics from inside or outside the spa, is waterproof, and even floats.

SAFE, RELIABLE, AND HASSLE-FREE

- Soundsations removes reliability worries, too. There are no pop-up speakers to malfunction, no moving parts to break, no fuses to blow, and no tape heads to wear out or clean.
- The spa sound system is not exposed to heat, chemicals, or water that can cause degradation.
- Soundsations is safe, reliable, and has earned Underwriters Laboratories (UL) approval.
- Since there are no expensive stereo components to purchase for use exclusively with the spa, Soundsations is more affordable than most spa audio systems.
- Marquis Spas backs it with a one year warranty. With Soundsations, you can add the option of a sound system to a spa with less risk, hassle, and expense.
